ACES- SLECMA Seminar on Lifts System (SS 550)

Date: 23rd January 2014, Thursday
Time: 1 p.m. to 5 p.m.
Venue: 18 Sin Ming Lane
#06-01 Midview City
Singapore 573960

CPD Points: 3PDUs qualified by PEB

Target Audience:
M&E Engineers, Lift Engineer, M&E RTO,
Facility Manager, and Building owner.

Synopsis:
The SS550:2009 was introduced in Feb 2010 to replace the older SS CP2 which was last amended in 2004. Since then, some changes to the SS550 were also done to further improve the code. Though many questions are still being asked on the SS550.

Apart from this, the development in the building industry has also brought in several difficult matters that are affecting the smooth handling of the lift projects, such as works which were more efficiently handled by others; the design of the proper and safer access for maintenance of lifts; the often-used private lift lobbies which are well-liked by architect / developer but posing ‘security’ and inconvenience problems to the residential occupiers and lift maintenance personnel; and lastly the recently introduced fire detector at all lift lobbies.

This seminar aims to provide the audience with not just the major differences between the SS CP2 and the latest SS550, but also the awareness and understanding on the several important matters that are affecting the lift industry practitioners.
