Important of site supervision cannot be understated as it ensures a high quality of work and has a direct impact on structural safety on construction sites.

Site supervisors are like the conductors of symphonic orchestras—they set the tone for health, safety and environmental performance. They are also the ambassadors for professionalism and safety at the worksites.

HIGHLIGHTS

5.30pm Registration / Dinner & Networking

7.00pm Welcome Address by ACES President, Er. Koh Boon Liang

7.05pm Welcome Address by IES President, Prof Chou Siaw Kiang

7.10pm Presentation by Building & Construction Authority (BCA) “Contraventions on site” by Er Tan Geok Lee, Senior Engineer, Construction and Enforcement Department, Building Engineering Group

7.20pm Presentation by Corrupt Practices Investigation Bureau (CPIB) “Corrupt Practices in the Construction Industry” by Mr. Sathiabalan M Veerapillai, Chief Special Investigator

7.50pm Presentation by Ministry of Manpower (MOM) “WSH in Construction Worksite” by Mr Chan Yew Kwong, Director (Occupational Safety & Health Inspectorate)

8.20pm Presentation of Plaques to Speakers

8.50pm Presentation of Awards to REs & RTOs

9.00pm Networking

10.00pm End
Speaker 1: TAN GEOK LEE

Topic: Contraventions on Site

Site supervisors are the eyes of the qualified persons for supervision, ensuring safety of buildings during construction. BCA act stated that every site supervisor appointed, shall ensure that all structural elements are carried out in accordance with every plan of the building works approved by the Commissioner of Building Control. This presentation shows the importance of site supervisors to prevent shortcomings on site that contravene BCA acts and regulations.

Er. Tan Geok Lee is a Senior Engineer with the Building Engineering Group (BCA). The Group regulates the design, supervision and construction of building and structures to ensure structural safety. She graduated from NTU with a Bachelor of Engineering (Civil) and a Master of Science (Civil) from NUS. She is a registered professional engineer in Singapore and has gained many years of working experiences in both private and public sectors.

Speaker 2: SATHIABALAN s/o M VEERAPILLAI

Topic: Corrupt Practices in the Construction Industry

This talk will give audiences a better understanding of what corruption is and the penalties for committing crimes in Singapore. The speaker will also talk about the work CPIB does and cite past, real-life cases to make the subject matter relevant and interesting for all participants.

Presentation outline:

- Introduction
- CPIB Prevention Video
- History and role of CPIB

- PCA
- Definition of Corruption
- Case studies
- Q & A

Mr. Sathiabalan is a Chief Special Investigator of the Corrupt Practices Investigation Bureau (CPIB), Prime Minister’s Office. He has more than 20 years of experience in conducting investigation into various types of cases, including corruption offences under the Prevention of Corruption Act, Chapter 241.

Currently, Mr. Sathiabalan is the CPIB’s representative with the Joint Investigation Team, CID for the investigation on soccer match-fixing spanning across Europe continent.

In his current portfolio, Mr. Sathiabalan plays a key role in sharing his experience in corruption prevention with officials from the public sector and staff from the private sector.

Mr. Sathiabalan graduated with Bachelor of Science (Psychology).
Speaker 3: CHAN YEW KWONG, Director
(Occupational Safety & Health Inspectorate)

Topic: WSH in Construction Worksite

Workplace Safety & Health (WSH) is for everyone and by everyone. WSH begins at
the design stage where every conceivable hazard is identified and its associated risk
suitably assessed and adequately addressed. This may be achieved through better
selection of material, machinery or equipment and establishment of an appropriate set
of safe work practices. In order to achieve successful WSH outcomes onsite, every
person at work involved with the project – both from the developer and builders – has
a role to play towards the goal of an incident and injury free project. He may be
involved with the project design and management, risk assessment and management,
site inspection and investigation, and/or work supervision and execution. The short
presentation aims to share the general principles of the WSH regime in Singapore.
The various stakeholders in the construction value chain – as well as their professional
responsibilities and legal obligations under the WSH Act.

MR CHAN YEW KWONG, Director, OSH Inspectorate, OSHD, MOM

Yew Kwong is the Director of OSH Inspectorate in the Ministry of Manpower’s Occupational Safety & Health Division.
He has been with the Ministry of Manpower for about 29 years. His 29 years' working experience in workplace safety
& health involves inspection & auditing of worksites, shipyards, chemical plants and other manufacturing factories,
investigations into fatal/serious accidents, development of WSH standards, guidance materials, management systems
and auditing. He was also previously the Director of Industry Capability Building, WSHC for about 2 years, during
which he was responsible for the national WSH competency framework and capability building efforts in organisations,
persons and delivery resources.

Mr Chan is very involved in the development and promotion of WSH-related Singapore Standards. He is a member of
the Singapore’s Standards Council and he chairs the Council’s General Engineering & Safety Standard Committee.
He is also Chairman of the Singapore Accreditation Council’s Technical Committee for Mechanical Engineering
Inspection.
