Participants from previous sessions in Singapore recommend this programme:

"A must-attend programme to understand the fundamentals of public transport. ***** stars to the programme."

"Trainings of such kind give us an insight on how to improve public transport and also give us the status of PT in many developed countries. It gave me an opportunity to harvest the best products and contributions to the development of the public transport in our country."

- Keen to learn from successful examples of transport policies, financial models and governance structures?
- Interested to know how cities have made public transport the preferred mode of choice for citizens?
- Looking to broaden your knowledge, for example in marketing, operational matters or contracting?

Join our Public Transport Fundamentals training in Singapore on 9-11 February 2015 and benefit from unique LTA and UITP expertise and know-how:

- Gain fundamental knowledge on public transport and sustainable urban mobility
- Benefit from extensive knowledge by tapping on UITP’s international expertise with LTA’s professional ‘on the ground’ operational experience
- Join a conducive platform for networking opportunities and interaction with other participants
