Conferred by The University of Newcastle, Australia

**BACHELOR OF CONSTRUCTION MANAGEMENT (BUILDING) (HONOURS)**

Every construction project combines a variety of complex challenges. Managing a project requires a combination of technical understanding of construction processes and resource management, as well as managing their legal and financial aspects.

This bachelor degree programme: (a) will equip you with the skills and knowledge to manage complexities in construction projects both in Singapore and across the world; and (b) is designed to be a problem-based learning pedagogy to train students to solve real world challenges, develop holistic understanding of construction project environment and portable life-long learning skills. An advanced standing articulation would be eligible for applicants with relevant diploma qualifications.

**Venue:** BCA Academy

- **Full-Time (12th Intake):** Starting on 25 Feb 2019
  (Application Closing date: 1 Feb 2019)
- **Part-Time (6th Intake):** Starting on 2 Apr 2019
  (Application Closing date: 8 Mar 2019)

Half-day Workshop on
Building Plan and Management Group
Annual Sharing

The workshop serves to provide a platform for OPs and industry stakeholders to be updated on new regulatory requirements that are in the pipeline, seek clarification on requirements, and provide feedback to BCA to fine-tune regulatory requirements for the built environment.

1 Day Course on
Managing Noise in Construction Sites

Requirements of noise control and management in construction sites are stipulated by NEA and MOM through legislations. To ensure that construction works do not affect neighbouring residents and businesses, noise levels are to be continually monitored in construction sites and kept within the permissible levels. Developers also require contractors to prepare and submit to them a Noise Management Plan which usually includes the baseline noise record, indicate the Noise Sensitive Receptors (NSRs) (such as hospitals, schools, etc.) and propose mitigation measures and public relation strategies to handle noise matters. Throughout the construction duration, contractors are required to implement all practicable measures while continuously monitoring the noise levels closely.

This course will enable construction personnel who are managing the site to be aware of the relevant regulations, understand noise and its measurements, and noise control techniques so that they would be able to prepare and implement a good noise management plan and thus manage the expectations of the neighbourhood.
