Importance of site supervision cannot be understated as it ensures a high quality of work and has a direct impact on structural safety on construction sites.

Site supervisors are like the conductors of symphonic orchestras—they set the tone for health, safety and environmental performance. They are also the ambassadors for professionalism and safety at the worksites.

Organised By:

RE & RTO Networking and Awards 2013

Venue:
Matrix Auditorium@ Biopolis
30 Biopolis Street
Singapore 138671

Fees:
Accredited RE & RTO: $30.00 (GST inclusive)
Others: $60.00 (GST inclusive)

CPD:
2 STU
1 PDU (TBA)

Dress Code: Smart Casual

Date: 22 February 2013, Friday
Time: 5:30pm - 10:00pm

Joint Accreditation Committee (C&S) C/o Institution of Engineers, Singapore 70 Bukit Tinggi Road Singapore 289758
Attn: Mr Brendon Ho

There will not be any certificate issued for this event.

Location map please log in:
Speaker 1: Er. Shee Siu Ming

Topic: Supervisory Duties of Accredited Site Supervisors

This presentation outlines the statutory requirement of site supervisors in the supervision of structural works at site. It is important that all accredited site supervisors know their statutory role to assist the qualified person (QP) to supervise structural works according to the approved structural plans. If construction irregularities are detected, the site supervisors are to take direct instruction from the QP to address the irregularities to prevent any unsafe practices during construction.

The speaker will share with you the statutory duties of the site supervisors as prescribed in the Building Control Act and its Regulations, and the recent changes made in the building regulations with regard to site supervisors in the supervision of Earth Retaining Stabilising Structures (ERSS) works at site.

Er. Shee Siu Ming is a Principal Engineer with the Construction and Enforcement Department in the BCA’s Building Engineering Group. Er. Shee is a registered PE(Civil) with more than 20 years of experience in engineering practices. Today, he is sharing with us the statutory duties of the site supervisors as prescribed in the building regulations.
Speaker 2: Mr Marcus Wee

Topic: Corrupt Practices in the Construction Industry

This talk will give audiences a better understanding of what corruption is and the penalties for committing corruption crimes in Singapore. The speaker will also talk about the work CPIB does and cite past, real-life cases to make the subject matter relevant and interesting for all participants.

Although some industry-specific cases will be cited, real-life examples pertaining to the “providing of false information to CPIB” and other legal provisions under the Prevention of Corruption Act will be mentioned as well. This will allow audiences to have a broad-based, holistic understanding of the topic on corruption.

Mr Marcus Wee joined the Corrupt Practices Investigation Bureau in 2006 and spent four years as an Investigation Officer directly handling cases. He is currently involved in Operations Management work and has given talks to public officers from various ministries and statutory boards on the dangers of corruption.
Workplace Safety & Health (WSH) is for everyone and by everyone. WSH begins at the design stage where every conceivable hazard is identified and its associated risk suitably assessed and adequately addressed. This may be achieved through better selection of material, machinery or equipment and establishment of an appropriate set of safe work practices. In order to achieve successful WSH outcomes onsite, every person at work involved with the project – both from the developer and builders – has a role to play towards the goal of an incident and injury free project. He may be involved with the project design and management, risk assessment and management, site inspection and investigation, and/or work supervision and execution. The short presentation aims to share the general principles of the WSH regime in Singapore. The various stakeholders in the construction value chain – as well as their professional responsibilities and legal obligations under the WSH Act.

Mr Winston Yew is currently a Deputy Director with the Occupational Safety & Health Division of the Ministry of Manpower, Singapore. He has more than 28 years of experience in policy formulation, standards setting and operation management in the field of Occupational Safety and Health. He is concurrently involved with certain working group and technical committee of the national standards setting agency Spring Singapore.
