12-Day Programme by SMU-BCA-WDA
Productivity and Leadership Development
Programme for Leaders of the Building & Construction Industry

- A 12-day, 7-module programme conducted over March to June 2012.
- Industry-specific, supported with relevant case studies for each module, to develop leadership and management capability for building and construction industry.
- Included building innovations and productivity module to identify opportunities/challenges to improve firms’ productivity in the long run.
- About 100 senior executives/potential leaders from the building and industry have benefited from this programme.

Date: 23 Mar ~ 9 Jun 2012

Online Registration by 9 Mar 2012, click here!
1-Day Course on **Good Industry Practices**
- Waterproofing for External Wall
- Marble/Granite/Ceramic Tiling
- Timber Flooring

To meet the rising expectation of the homeowners, the Quality Mark (QM) Scheme was launched in July 2002 to propel the industry workmanship standards to a greater height.

These “Good Industry Practices“ courses aims to share with the industry the good practices in respective areas.

**To register for:**
*Waterproofing for External Wall on 6 Mar; [click here!](#)*
*Marble/Granite/Ceramic Tiling on 13 Mar; [click here!](#)*
*Timber Flooring on 20 Mar 2012; [click here!](#)*
1-Day workshop on Preparing and Defending Loss and Expense Claims

Many on-going projects run the risk of going into disputes, claims, delay and disruption. “Loss and Expense” claim is one of the cost claims that are likely to be encountered by contracting parties of a construction project. At the end of the workshop, participants would:

- be equipped with the necessary knowledge to manage Loss and Expense claims;
- be able to recognize the “do’s and don’ts” in the claiming process;
- acquire knowledge of legal and technical aspects of claims from experts

Date: 8 Mar 2012

13-Evening Certification Course on **Design of Precast Concrete Structures for Engineers**

Structural design of precast concrete structures is significantly different from the design of cast-in-situ structures. The difference lies in the structural continuity of individual precast concrete components that are connected by a number of joints. The connections act as bridging links between the components. Hence structural engineers who design precast concrete structures should have a good understanding of the behaviour and design principles of connections to ensure stability and safety of the structure.

This course will address the structural design issues of precast concrete technology. It also aims to train the practitioners on the practical design of precast concrete structures in an interactive manner.

**Date:** 20 Mar - 8 May 2012  
**To register, click here!**
National Building Qualification in
* Project Supervision (PS)
* Supervision & Coordination of M&E Works (SCMEW)
* Green Building Operation & Maintenance (GBOM)

The National Building Qualification (NBQ) is a three-tier certification system designed and developed by the BCA Academy for site personnel and new entrants to the industry. The NBQ certification provides an alternative path for persons with secondary school education to pursue a higher education in technical fields, such as Diploma programmes.

Date: Starting in Early Apr 2012

To register,
- NBQ in PS; click here!
- NBQ in SCMEW; click here!
- BQ in GBOM; click here!
