CONSTRUCTION SAFETY MANAGEMENT
COURSE FOR QUALIFIED SITE SUPERVISORS
Organised by LTA Academy
(Set up of the Land Transport Authority, Singapore)

Brief
The objective of the course is to provide participants with knowledge on occupational safety and health specific to the construction industry to manage the construction of land transport infrastructures such as rapid transit systems, road tunnels and viaducts, expressways as well as commuter and road facilities. The course will help participants to appreciate the legal aspects of workplace safety and health (WSH) as well as to understand the Land Transport Authority (LTA)’s WSH management processes and requirements. This will enhance the WSH knowledge of the participants to take on a proactive role and participate actively in WSH management on-site.

In this course, experienced and specialist LTA staff will share their expertise and experience in managing WSH on land transport construction projects.
