TO: ALL FIDIC MEMBER ASSOCIATIONS

FIDIC-ACES-EFCA Regional Infrastructure Conference & Corporate Training Event
“The Road to Smart Infrastructure” – 09/10 March 2017, Belgrade, Serbia

This third edition of the specialist regional conference is focusing on how modern technology can help improve the way in which we run our businesses; to become more cost effective whilst improving quality and efficiency in all our activities: project-programming, procurement and project implementation. Nevertheless we stay true to our commitment to raise awareness that FIDIC forms of contract can be used, and are successfully used, in the European region, even if this is in a market predominantly regulated by public law and, as such, by public procurement rules.

Discover the updated Programme, packed with rich topics, and paved with excellent speakers, to understand the importance and value of attending this special event. It offers you a range of best practices, gained from years of practical experience, set in a modern technological environment, impacting with innovation on all businesses involved in developing infrastructure today.

- Join the discussions, led by carefully chosen experts, taking you down some well-trodden paths, towards a successful future, with some highly valued tools
  o Interactive Discussions with lessons learnt and how-to guidance
  o FIDIC Business tools – procurement guide; contracts guide;
  o and receive practical tips on working with Procurement Agencies, FIDIC contracts, and the EU Directives

  all with the assistance of modern technology – including tools such as BIM, the Internet of Things, block chain technology, and much more…

FIDIC Member Associations are entitled to a special discount by registering and informing the FIDIC secretariat. Please click on the link below to register and to acquire more information.
