Safety at construction site is of primary concern to contractors. Contractors who adopt good safety measures will achieve benefits in several areas, such as lesser loss of man-hours, completing project on schedule etc.; as well as intangible benefits such as improvement in staff morale, staff relationship, and enhancement in security of families and the community.

- **Building Construction Supervisor Safety Course (BCSS)** will help participant to understand the safety hazards in the construction industry, and preventive measures for safe work.

- **Formwork Safety Course for Supervisor (FSCS)** will help participant to understand and apply relevant Act and Codes of Practice to formwork structure construction, erection, alteration or dismantling in worksite. It will also help participant to identify hazards and control measures.

½-day Course on
Best Practices for Green and Gracious Builder

BCA launched the Green and Gracious Builder Scheme (GGBS) in February 2009 to raise the environmental consciousness and professionalism of builders. It is also a benchmark of a builder’s corporate social responsibility to the environment and the general public. To create GGBS awareness, BCA together with Singapore Contractors Association Limited (SCAL), launched a course on Best Practices for Green and Gracious Builder.

This half-day course consists of lecture conducted at BCA Academy followed by visit to a site by Green and Gracious Builders Award (GGBA) winner. It will serve as a platform to share the best green and gracious practices gathered from builders in the GGBS to assist participants in addressing environmental concerns and mitigating possible inconveniences to the public caused by construction works.

2 ½ -day Course on **Internal Audit (QEHS) Course based on QUALITY ISO 9001, ENVIRONMENTAL 14001 & HEALTH & SAFETY OHSAS 18001**

The Internal Audit (QEHS) course (based on requirements on Quality Management System, Environmental Management System and Occupational Health and Safety Management System) aims to equip Internal Auditors with the knowledge and skill required to assess, monitor and measure the performance of an organisation’s integrated QEHS Management system.

As the ISO 9001 and ISO 14001 have recently undergone a major review, the course includes the latest updates of the new editions and highlights the necessary revisions to ensure smooth transition from the current version.

4-Evening Course on **Pile Foundation Design and Construction for Engineers**

All structures are to be supported on sound foundation for their safety and subsequent performance. A good understanding of the pile foundation design principles and construction practices is essential for every practitioner, designer, builder and supervisor involved so that structures will be built and maintained safely throughout the life of the structure.

This course aims to provide participants with an insight into the engineering principles of pile foundation design as well as good construction practices adopted locally with special emphasis on cast-in-place reinforced concrete bored pile compression.
