LTA-UITP Training Programme on Regulation In Public Transport 27-29 April 2015, Singapore

Jointly Organised by UITP Centre for Transport Excellence (CTE) in Singapore and LTA Academy, Land Transport Authority (LTA), Singapore, this programme aims to provide a better understanding of how public transport is regulated and contracted, to offer an integrated, quality driven and efficient service to commuters.

This training combines UITP’s international knowledge with LTA’s experience as a regulator of public transport in Singapore. The course also provides opportunities for participants to take part in interactive discussions and to share their experiences.

Registration is closing soon and please click here to register.

Objectives

- Provide participants with fundamental knowledge on the importance of a well regulated public transport system, and introducing them to key contracting models
- Present basic definitions and concepts related to the organisation and regulation of public transport services, and illustrate them with international examples of best practices
- Share Singapore’s experience in regulating rail services and its recent transition to a government contracting model for the public bus industry

elizabeth.teo@lta.gov.sg
• Gain a good understanding of contract management through international best practices
• Allow exchange of knowledge by tapping on UITP’s international expertise and LTA’s professional ‘on the ground’ operational experience
• Provide a conducive platform for networking opportunities and interaction amongst participants
• Discuss lessons learnt from these models of organisation: success factors, challenges and limitations

**Programme Outline**
