Measurement Series: Piling & Diaphragm Walls

The 2-day measurement workshop is designed to equip participants with the essential knowledge and understanding to measure quantities based on the principles and rules set forth in the Singapore Standard Method of Measurement of building Works (Second Edition). Principles of measurement related to Piling Works with examples will be illustrated, and opportunities will be provided for participants to participate in hands-on activities. The following topics will be covered:

- General principles for Measuring Piling Works
- Wood Piles
- Concrete Piles
- Steel Piles
- Diaphragm Walls

It will be most relevant to Quantity Surveyors, Contractors, Contract Managers and any building professionals who are not familiar with measurement of piling works.

Trainer

Lim Cher Yam is a chartered Quantity Surveyor. He has had near 35 years of work experience spanning private and public sectors in construction and property management domains. He has served in numerous capacities over the course of his career, including stints in senior management, consulting and academia.

Cher Yam has had extensive teaching and academic management experience having taught and developed curriculum in local tertiary educational and professional institutions. These include crafting syllabi, developing and teaching built environment related courses for full time and adult learners.

In a senior managerial capacity, Cher Yam managed academic schools and other infra-structural support departments such as IT and Estates and Development, providing him with deep knowledge of these sectors.

Cher Yam holds a number of academic appointments at present, having been appointed as an Associate Faculty member for SUSS, an Adjunct Lecturer with the University of Newcastle (Singapore) and the Building & Construction Authority Academy, and Chief Trainer for the SISV Certificate in Measurement of Building Works course.
