GOOD INDUSTRY PRACTICES - WATERPROOFING FOR EXTERNAL WALL

Water seepage through external walls, mostly occurred by ingress of rainwater, was found to be a common defect faced by homeowners. To enhance water-tightness performance of external walls, it is important to look at the use of suitable materials, adequate wall thickness, design of proper construction details and surface rendering and finishes. This course complements the Good Industry Practices Waterproofing for External Wall and highlight the good practices introduced in the guidebook.

Venue
BCA Academy, 200 Braddell Road, Singapore 579700

Date and Time
7 Mar 2017 to 7 Mar 2017
0900 to 1730
Fee (Incl of GST): S$340.00
Lunch & refreshments will be provided.

GOOD INDUSTRY PRACTICES - TIMBER DOORS, WARDROBE & KITCHEN CABINET

Timber doors, wardrobes and kitchen cabinets are important components to residential homeowners. However, these components are often seen as problematic areas with defect complaints. The Good Industry Practices - Timber Doors and Good Industry Practices - Wardrobes & Kitchen Cabinets were developed to share with the industry good work practices adopted by practitioners and contractors who have consistently delivered high
quality work. This course complements the guidebook by providing practical tips on how good quality timber doors, wardrobes and kitchen cabinets can be achieved on site.

**SITE MANAGEMENT OF PRECAST CONCRETE CONSTRUCTION**

Precast concrete technology had been identified as one of the key areas of focus to improve productivity in the construction industry. It has been observed that there is more room for a greater adoption of this technology in Singapore. Good site management practices and planning of precast concrete construction activities such as on-site/off-site casting of precast members, transportation of the members to site, erection and construction considerations would contribute to more efficient, less labour intensive and faster construction. This would eventually lead to better construction productivity. This workshop provides construction managers with practical knowledge in the planning, execution and control of precast concrete construction. At the end of the workshop, participants will be able to plan and manage precast concrete construction site activities effectively.

**GOOD INDUSTRY PRACTICES - PAINTING**

The Good Industry Practices - Painting was developed to highlight good painting practices adopted by practitioners and to raise awareness of the different paint systems, the selection criteria and application processes. This course complements the guidebook, by providing practical suggestions on how good quality painting can be achieved on site. Common defects associated with paints, their causes and preventive measures are also covered in this course.

**SUPERVISION OF PILING WORKS**

Various challenges are present in pile foundation works due to the uncertainties and variability of the ground conditions. Once the piles are installed, they are expected to function throughout their lifetime. During the lifetime of the building, the foundation is rarely inspected for its continued structural integrity and stability. Supervision of piling works for building foundation is therefore essential and critical in ensuring the quality of
construction works and safety of building structures. This short course imparts to participants the essential knowledge of good construction practices, supervision of piling works, regulatory requirements and testing of pile foundation works.
