On 10 June 2015, many facility management (FM) fraternity around the world is celebrating the World FM Day, to recognise the contribution of FM professionals for their commitment and contributions to the economies and businesses globally. This year, befitting to the World FM Day’s theme of Building Resilience for The Future, we would like to encourage all FM professionals and stakeholders to continue strive for innovative FM solutions to do better, faster and more efficiently.

As part of this continuous development, come join us at the World Workplace Asia Conference & Exhibition 2015, at Singapore’s Marina Bay Sands from 3 to 5 August 2015 – be there to network and hear from established FM leaders/source for workable FM solutions that will help build up your organisational and individual excellence! Please refer to the appended eDM for details of the World Workplace Asia 2015.

For enquiries or feedback, please email us at bca_academy@bca.gov.sg. Visit the BCA Academy’s website now for other seminars/courses details.
Proactive Facility Management:

**ANTICIPATE • PARTICIPATE • INNOVATE**

3 - 5 AUGUST 2015, MARINA BAY SANDS, SINGAPORE

### BIM & FM: HOW BIM IS TRANSFORMING FACILITY MANAGEMENT IN ASIA & AROUND THE WORLD

Building Information Modelling (BIM) is transforming architecture, engineering and construction; however, the greater potential of BIM is to provide accurate, timely and relevant information throughout the life cycle of a building.

Michael will discuss new approaches that are helping building owners and facility managers leverage information in BIM. He would share on new ways to specify the information hand-off in design and construction contracts; using BIM data to implement a maintenance management system; using BIM as a platform for collaboration between owners, architects, engineers and contractors; what BIM technology will mean for FM skills and processes; and the hidden value of BIM, providing a way to keep building information up-to-date through ongoing renovations, retrofits and remodeling. At the session, Michael will also share his experiences working with organizations that are using BIM data for facility management operations.

### THE FACILITY MANAGER (FM) AS INFLUENCER IN THE C-SUITE: STRATEGIC PERSPECTIVES

FMs are adept at operations management and superb at crisis management, reacting well to emergency situations. FMs are generally considered good fire-fighters and care-takers. While these skills are important, they can only carry you and your profession so far. Success in the C-suite requires a broad understanding of FM, combined with strategic and leadership skills. Recognize the skill set and credentials necessary to gain influence inside the C-suite.
