I Think, therefore I Am.

The knowledge that has made my readers doubt their preconception, prompting them to question their assumptions, and to seek a deeper understanding of the world and their place within it is the most valuable contribution I can make. I strive to challenge their current beliefs and to stimulate new ideas. I believe that through critical thinking and open-mindedness, one can lead a more fulfilling and meaningful life.

Programme

Forum Chair: Assoc. Prof. Ng Wei Keen

Can We Plan for 2030?

I think that the future of urban planning and sustainability is bright. The knowledge that has made my readers doubt their preconception, prompting them to question their assumptions, and to seek a deeper understanding of the world and their place within it is the most valuable contribution I can make. I strive to challenge their current beliefs and to stimulate new ideas. I believe that through critical thinking and open-mindedness, one can lead a more fulfilling and meaningful life.
