Dear ACES Members,

**Invitation to Participate in DfS Survey**

The Workplace Safety and Health (WSH) Council would like to invite ACES to participate in a survey on Design for Safety (DfS).

**Background**

2. WSH Council launched the Guidelines on Design for Safety in Buildings and Structures in 2008, in collaboration with Ministry of Manpower, key builders, designers and developers. As part of DfS capability building, WSH Council developed and launched the 2-day DfS Coordinator course in 2010 which aims to equip experienced design and construction professionals with safety and health knowledge. WSH Council further launched the DfS Recognition Scheme in 2011 to recognise projects and teams which had adopted Dfs and reduced risks through design of building and structure. The scheme includes the DfS Mark and the DfS Award.

**DfS Survey**

3. To help us enhance your DfS experience, we would like to hear from you on the following:

a. Guidelines on DfS in Buildings & Structures
b. Capability Building (e.g. training) for DfS
c. Outreach and Promotion for DfS
d. Legislation for DfS

4. The online survey will take about 5 minutes to complete and can be accessed [HERE](#). The deadline for the survey is 30 June 2012.

5. We appreciate ACES’ support to encourage members to take part in the survey.

Thank you.

Regards,

MS Lui Yock Siew
Senior Manager
Strategy and Development (Construction)
Industry Practices, Sensing and Engagement Department

**Vision:** A Safe and Healthy Workplace for Everyone. **Mission:** To lead industry efforts in strengthening capabilities and building a progressive culture in WSH.
