Seminar Information

Date: 22 May 2015 (Friday)
Time: 1.30 pm – 5.00 pm
Venue: 2 Bukit Merah Central Auditorium, Podium Block Level 3
Singapore 159835

Fee per pax (inclusive of GST): $42.60
Fee includes a copy of SS ISO 50004:2014 and light refreshments.

Closing Date: 18 May 2015

Enquiries:
Ms Gwen Ho Tel: 6709 4875
E-mail: ftpc3@eurekacampaign.com
Operating Hours: 9.30am – 5.30pm

How to Register

Please register using the following methods:

1) Email the completed form to: ftpc3@eurekacampaign.com
2) Fax the completed form to: 6709 4880 or
3) Post the completed form together with cheque to:

SPRING Standard Seminars
 c/o Eureka Campaign Associates Pte Ltd
 132 Joo Seng Road
 Uniplas Building #03-01
 Singapore 368358

All cheques should be crossed and made payable to Eureka Design and Exhibits Planners. No invoice will be issued.

Registration is on a first-come-first-served basis and will be confirmed upon receipt of full payment. For email and fax registrations, please ensure that your cheque reaches us within 5 working days. No refund will be made for any cancellation. However, a replacement is allowed. The Organiser reserves the right to postpone or cancel the seminar due to unforeseen circumstances.

Mobile: ____________________ Tel: ____________________ Fax: ____________________

Cheque Number: ________________ Professional Engineer’s Licence Number: __________

NRIC No: _______________________ (applicable to Professional Engineers only)
Introduction

For many businesses, the cost of energy is high, so improving their energy efficiency can be the key to remaining competitive. There has been growing recognition that an effective energy management system can help reduce energy costs and environmental impact.

ISO/TC 242 is the International Technical Committee responsible for developing standards on energy management. As a participating member of ISO/TC 242 (Energy Management), Singapore facilitates the consolidation of comments and process of consensus-building among the stakeholders in the National Mirror Committees and thus contributes to the international standards development work.

In addition to the publication of ISO 50001 (Energy management systems - Requirements with guidance for use) which helps organisations to systematically plan and manage their energy use, ISO/TC 242 has developed a suite of complementary energy management system (EnMS) standards which will guide organisations through the various stages of setting up an EnMS. These standards, which are adopted by Singapore, consist of:

• SS ISO 50002 (Energy audits – Requirements with guidance for use)
• SS ISO 50003 (EnMS – Requirements for bodies providing audit and certification of energy management systems)
• SS ISO 50004 (EnMS – Guidance for the implementation, maintenance and improvement of an energy management system)
• SS ISO 50006 (EnMS – Measuring energy performance using energy baselines (EnB) and energy performance indicators (EnPI) – General principles and guidance)
• SS ISO 50015 (EnMS – Measuring and verification of energy performance of organisations – General principles and guidance)

Note: ISO 50001 was adopted as a Singapore Standard in 2011.

In supporting the implementation of SS ISO 50001, the above-mentioned standards provide guidance to help organisations institutionalise the policies, procedures, and tools to systematically track, analyse and improve energy efficiency.

Who Should Attend

• Organisations keen to find out more about energy management solutions
• Energy managers and coordinators (management representatives, plant managers, facility managers, process owners, engineers)
• Energy services companies (ESCOs), energy system auditors and energy management professionals/consultants
• Relevant government agencies

What You Will Learn

• Overview of the energy management systems standards and how to use the energy management standards effectively.
• The initial preparation steps for the adoption of energy management standards.
• How to implement an energy management system and establish the processes necessary to improve energy efficiency.
• Best practices and benefits of implementing energy management system.
