Understanding Obligations and Liabilities in Building and Construction Works with focus on Building Control Act

The stakeholders of construction projects often incur liabilities due to their failure to recognise and comply with certain implied obligations which maybe arouse during the design and construction processes. It is, therefore, imperative for the project parties to understand the implied obligations and liabilities prior to the commencement of construction projects.

This course will provide the participants with an insight into the obligations and liabilities of the key players in building and construction works, with focus on the Building Control Act. It will cover the various obligations under contract, tort and statutory duty in building and construction works. The main focus will be on the regulatory framework of the Building Control Act and the recent developments of the Act.

**Application for Extension of Time - Factors for Success**

In the construction industry, it is known that application for extension of time and claims for prolongation cost can be a contentious issue in the Industry. Though standard conditions of contract like SIA and PSSCOC have provisions for extension of time, there are issues pertaining to the proper procedures for application of EOT, claims for loss and expenses or prolongation cost and documentation for evidence of delays and justifications that need to be addressed. This course is designed and structured to provide insights and depth into the factors that will affect the success of EOT application and the recovery of prolongation cost.
