Dear Built Environment & Sustainable Development Professionals,

BCA Academy, the education and research arm of the Building and Construction Authority (BCA), has been organising executive development programmes (EDPs) to professionals from the built environment since 2002. Through these EDPs, we hope to build up the knowledge and competencies of the industry professionals to support national initiatives towards a safe, high quality, sustainable and friendly built environment of Singapore.

**TU Braunschweig-BCA Executive Development Programme: Innovations in Sustainable Design & Technology 2012**

This year, we will be organising the above mentioned EDP in Germany from 3rd to 7th September 2012. The format of the programme would include (i) classroom sessions with leading experts sharing on innovative concepts/key developments in sustainable design and cutting-edge technologies, and (ii) learning journeys to eco-settlement, successful retrofits, energy self-sufficient buildings, and smart grid projects in 4 cities, namely, Frankfurt, Berlin, Braunschweig and Kassel. As Singapore continues to develop eco-friendly precincts, this programme would help to update participants on latest developments/initiatives that could be adapted and adopted to Singapore’s context.

We would like to invite your participation for the EDP. For registration/more information of the programme, please “click here” or visit www.bcaa.edu.sg.

**Note:** A 10% discount on the course fee is available for registration before 31 July 2012.

Thank you.

Regards,
Yong Wee Hau • Senior Manager • Head (Business Development) • BCA Academy • Tel: +65 62489848 • Fax: +65 62580558
