LEADERSHIP IN GREEN BUILDING
9th Lecture Series

REALIZING THE FUTURE OF SUSTAINABLE GREEN BUILDING DESIGN THROUGH BIM AND PREFABRICATION

6 June 2013, 2.00 to 5.00pm
BCA Academy

- Would it be possible to create an aesthetic, and yet high performance inclusive architecture?
- Is it possible to integrate manufacturing methodologies with sustainable architecture?
- Is it possible to create a sustainable green buildings through technology-manufacturing integration?

We would like to invite your participation at the series’ 9th Lecture, where you will have the opportunity to gather insights from actual projects presented by renowned architect, Mr James Timberlake, and leading architectural design group in China, Xian Dai Architectural Design Group.
