For re-take information, please click here

--------------------------------------------------------------------------------------------

CERTIFICATE IN COST MANAGEMENT AND ESTIMATING (7TH INTAKE) 2019

The design and construction of building projects is highly complex and demanding process involving multiple disciplines such as architecture, civil and structural engineering, mechanical and electrical engineering, quantity surveying and construction. Delivering a project of high complexity within the right cost budget, time schedule and quality is critical in meeting client’s project objectives. Cost management and estimating provides project owners, developers, consultants and contractors the certainty and economy of cost over the life cycle of a building with the use of cost modeling, planning and management techniques.
