Half-Day BCA-REDAS Quality And Productivity Seminar 2011

Jointly organised by BCA-REDAS, this seminar aims to raise the quality and productivity in the construction industry. At the same time, it also serves to encourage adoption of productive methods in construction.

The speakers will share case studies and industry best practices to showcase the advantages of using latest technology and methods to achieve high levels of productivity and quality.

Date: 18 October 2011
To register, click here!

Jointly organised by BCA Academy and the Singapore Institute of Surveyors and Valuers, the seminar provides a platform to discuss the use of alternative construction procurement methods. Key points include drafting of suitable contracts for non-traditional systems. In addition, dispute resolution mechanism in resolving problems throughout the construction process would also be covered in the presentations.

• “Early Bird Fee”: Valid till 10 Oct 2011
• “Member/Affiliate Member Fee” is Available
2- Day Workshop on Delivering Winning Presentations for Building Professionals

Across the world, a few million presentations are made every day. Many of them end up with their audience unimpressed or indifferent. Building professionals are often required to present their ideas, proposals, budget, consultancy, progress-reviews, either to their own management or to external stakeholders. The ability to present and convince your target audience is important to succeed in business and your career. This 2-day workshop offers you the ‘Mind-set, Skill-set and Tool-set’ to become a good presenter.

Date: 20 & 21 October 2011

4-evening Course on **Geotechnical Instrumentation for Engineers**

Geotechnical instrumentation plays an important role in the design verification and safety monitoring of geotechnical works. Being a specialised area, engineers and QPs need to be more familiar with instrumentation used for deep excavation, their installation, monitoring and interpretation to ensure safety of excavation works and adjacent structures.

**Date:** 16, 18, 23 & 25 Nov 2011

3-Day Course on **Computational Fluid Dynamics (CFD) Airflow Modeling for Green Buildings**

The course is offered as part of BCA’s Certified Green Mark Professional Programme to raise industry capability in the niche area of Sustainable Design and Development. The course aims to (a) provide participants with an overview of the use of CFD tools in the context of built environment and more specifically in the process of designing and delivering a green building; (b) equip participants with CFD modeling techniques and relevant software skills; (c) expose participants to representative building airflow modeling examples with an established CFD software tool; and (d) familiarize participants with the CFD simulation requirements in BCA’s Green Mark Standards.

**Date:** 28, 29 & 30 November 2011
