BUILDING AND GROWING A THRIVING URBAN FOOD ECO-SYSTEM

Co-organised with Agri-Food & Veterinary Authority, Singapore
Tuesday, 10 July 2018

Amidst growing pressures on scarce food resources, rapid urbanisation rates and the impacts of climate change, there is a growing concern that global supply of food may not keep up with the growing demand. As a city state of about 730km2, Singapore's resources—land, water and electricity—face many competing uses. Currently, less than 1 per cent of the land is used for agricultural food production and more than 98% of Singapore's food is imported. Fortunately, recent growth in innovative technologies in the agriculture sector has opened up opportunities for cities like Singapore, making it now possible for farms to "grow more with less". Beyond technology innovations, what else would it take to build and grow a thriving food ecosystem in an urban environment? This session brings together experts in the field of cluster development and in the forefront of agri-technology innovation to discuss and provide insights on urban food solutions.

Participating in WCS 2018

Seeking out the next cutting-edge solutions for smart nations and urban environment?

Trade visitor registration for City Solutions Singapore 2018 is now open. With over 1,000 water, city and environment solution providers exhibiting, few other exhibitions in the world cover these key sectors in such an integrated manner.

Early Bird Promotion is Ending

Early Bird rates are extended to 14 May 2018. Enjoy 10% off registration fees before it ends!
CO-LOCATED EVENTS AT WCS 2018

INCLUSIVE HEALTHY PLACES - PRACTICAL ADVICE ON INCLUSION AND HEALTH IN PUBLIC SPACE
Date: 8 July 2018 (By-invitation only) & 10 July 2018 (Open for walk-in)
Organised by: Cities Changing Diabetes, Gehl, C40

Everyday environments play a fundamental role in shaping how healthy we are as individuals and communities. The two sessions aim to solicit feedback from participants on a new framework for creating inclusive and healthy places, and to discuss how quality public spaces fit into a broader culture of health. Gehl will be presenting case studies on mobility, healthy food systems and best practice public space design; C40 will be presenting on reflections regarding to climate change; while Cities Changing Diabetes will be focusing on health.

SOCIAL RESILIENCE THROUGH SPORT & PHYSICAL ACTIVITY
Date: 10 July 2018 (Open for walk-in)
Organised by: SportsSG and Portas Consulting

Sports and physical activity have been proven to improve physical health, deliver economic benefits and generate greater social cohesion. Yet policy-makers still grapple with the challenges of developing comprehensive metrics that support decision making. Active Citizens Worldwide was launched in partnership by Singapore, London and Auckland, to demonstrate the value of an active lifestyle and identify strategies that would maximise impact. The cities will showcase unique insights on the societal return of a more active city with an open discussion around the drivers of physical activity and its ability to build resilience.

AGE-FRIENDLY CITIES: LESSONS FROM SEOUL AND SINGAPORE
Date: 10 July 2018 (Open - registration required)
Organised by: Seoul Institute and Centre for Liveable Cities

The Centre for Liveable Cities is collaborating with the Seoul Institute for their third joint research project, Age-Friendly Cities. Case Studies and insights from both cities on ageing policies will be shared, followed by a panel discussion with experts from both cities on creating age-friendly urban environments.

SUPPORTED EVENT: AVPN CONFERENCE 2018

With the theme "Maximising Impact", the AVPN Conference 2018 reflects the importance of strategic, collaborative, and outcome-focused approaches to social investing - from philanthropy to impact investing, the conference will cover a range of impact areas and investment approaches.

The AVPN Conference has been sold out, but special waitlist consideration is given to WCS delegates. Contact conference2018@avpn.asia and reference WCS to inquire about an open slot. All attendees must be social sector funders or resource providers to be eligible.
The Keppel Group leads the Singapore consortium in the development of the Sino-Singapore Tianjin Eco-City, a landmark bilateral project between the Governments of Singapore and China to create a practical, scalable and replicable model for sustainable development for other cities in China. Celebrating its 10th anniversary in 2018, the Eco-City has been transformed from a non-arable, water-scarce site to a vibrant and sustainable community.

Keppel is a multi-business company committed to providing solutions for sustainable urbanisation, meeting needs in energy, urban living, infrastructure and connectivity.
