Professional Technical Talk Series

DESIGN FOR SAFETY 101
UNDERSTANDING THE ESSENTIALS FOR PROJECT MANAGERS
(SPMS CPD: 3 Points / PEB and BOA PDU to be Advised)

Synopsis

Design for Safety (DfS) is regulated from August 2016, and projects over $10 million have gone through the process in the last 2 years. As the DfS process has to be carried out in tandem with the project schedule, the timing for the various DfS workshops is critical to ensure that they are carried out with sufficient information from the designers. Project Managers need to understand what the process constitutes and work closely with the DfS Professional to ensure that the workshops are fruitful. It is also important to engage DfS Professionals who are able to facilitate the workshops well, so that there is active participation from the designers.

This talk will focus on the DfS process, and how the Project Managers can incorporate this process into the project schedule, without affecting the project delivery date. We also discuss on the criteria and attributes of the DfS Professional, so that the GUIDE workshops are effective.

About the Speakers

Er. Lim Peng Hong
Er. Lim Peng Hong is a Professional Civil Engineer with 35 year of experience in structural, transportation, civil and geotechnical engineering in the region. He is registered in the specialised branch of geotechnical engineering under the Professional Engineers Board, and is a Specialist Accredited Checker for Geotechnical Building Works. He was a member of the Singapore Professional Engineers Board (PEB) from 2008 to 2017 and is a Past President of the Association of Consulting Engineers Singapore. He chairs the Engineering Academic Advisory Committee for ITE, and the Technical Committee for Structures and Sub-Structures in Enterprise Singapore (ESG), besides being a member of the Building and Construction Standards Committee in ESG. He received the Lifetime Achievement Awards from the Association of Consulting Engineers Singapore in 2017, and the National University of Singapore Distinguished Engineering Alumni Award in 2018.

Ms Sumay Tan
Ms Sumay Tan has over 12 years of experience in the construction and consultancy field. She has experiences in civil and structural design, construction supervision and the coordination of projects. Sumay had been involved with a variety of projects with clients from both private and public sector and was most recently involved in the development of Khoo Teck Puat Hospital, Ng Teng Fong Hospital and Jurong Community Hospital. Her experiences in mega-sized fast tracked projects has enhanced her knowledge of the various design codes and agencies’ statutory requirements in Singapore. These, coupled with her strong ability to understand complex and difficult project operations and her strengths in articulating her client’s qualitative and quantitative needs, had allowed her to facilitate the Design for Safety processes effectively from project conceptualisation stage to completion.

Details

Venue : Singapore University of Social Sciences
463 Clementi Road, Lecture Theatre Blk C SR C.4.14 Singapore 599494

Date   : 23 May 2019
