Half- Day BCA-REDAS
Quality And Productivity Seminar 2011

Jointly organised by BCA-REDAS, this seminar aims to raise the quality and productivity in the construction industry. At the same time, it also serves to encourage adoption of productive methods in construction.

The speakers will share case studies and industry best practices to showcase the advantages of using latest technology and methods to achieve high levels of productivity and quality.

Date: 18 October 2011

Jointly organised by BCA Academy and the Singapore Institute of Surveyors and Valuers, the seminar provides a platform to discuss the use of alternative construction procurement methods. Key points include drafting of suitable contracts for non-traditional systems. In addition, dispute resolution mechanism in resolving problems throughout the construction process would also be covered in the presentations.

4-Evening Course on Pile Foundations Design and Construction for Engineers

All structures are to be supported on sound foundation for their safety and subsequent performance. A good understanding of the pile foundation design principles and construction practices is essential for every practitioner, designer, builder and supervisor involved so that structures will be built and maintained safely throughout the life of the structure.

This course aims to provide participants with an insight into the engineering principles of pile foundation design as well as good construction practices adopted locally with especial emphasis on cast-in-place reinforced concrete bored piles in compression.

Date: 8, 10, 15 & 17 November 2011

1-Day Course on **Good Industry Practices – Aluminium Window**

The Building and Construction Authority (BCA) has been promoting the use of Construction Quality Assessment System or CONQUAS as the de facto national yardstick for measuring the workmanship quality of building projects.

To complement this, BCA Academy has developed a series of publications called Good Industry Practices Guides. The objective of these guides is to share with the industry good work practices adopted by contractors and practitioners who are able to consistently deliver high quality work. This “Good Industry Practices – Aluminium Window” training course is to share with the industry the good practices collated during the compilation of the guidebook.

2-Evening Course on Good Governance for Management Corporation

The increasing sophistication of property owners and their rising expectation for good governance in managing strata-titled developments could pose a daunting challenge to the management councils. It is important that members of the management councils of such developments are well-equipped with the knowledge of the regulatory framework and the related accounting and auditing requirements under the provisions of the Building Maintenance and Strata Management Act (BMSMA).

At the end of the course, participants will gain an insight into the regulatory framework, the roles and responsibilities of the stakeholders in strata developments, the procedure in conducting general and council meetings of the Management Corporation, the by-laws of Management Corporation and the accounting & auditing requirements that govern the managing of strata property developments.

Date: 21 & 22 November 2011
