2-day Course on
Sustainable Facility Management Solutions

The role of facilities managers is to manage the operations of buildings and to minimise operational life cycle costs, as well as the impact of buildings on the built environment. With globalised competitiveness in business operations, FM professionals need to be knowledgeable about business management, strategic planning, construction management and engineering towards sustainability in FM.

The 2-day course aims to provide the participants with the knowledge on how to make a business case for sustainability; establish programs to reduce, reuse and recycle; the analysis of the life cycle costing of sustainable buildings and carrying out building commissioning.

**CPD Points**
**PEB:** 14 PDUs

**Date:** 13 & 14 Aug 2014  
**Venue:** BCA Academy

1-day Workshop on
Planning, Design, Construction and Commissioning
of Storey and Staircase Shelters

The mandatory provision of civil defence (CD) shelters for all new residential
developments started in 1998. Owners have the option of providing household shelter
within the dwelling unit or storey shelter on each floor. The staircase shelter concept was
later introduced to allow for alternative design for architects and designers with more
design options in building development with respect to space planning, building
configurations and apartment unit design layout.

This workshop will provide participants with insights of good CD shelter design and
construction practices in compliance with technical requirements. Design consideration
of new scissor staircase shelter concept and sneak preview of the proposed changes to
storey shelter design requirements will also be covered.

4-Evening Course on Pile Foundation Design and Construction for Engineers

All structures are to be supported on sound foundation for their safety and subsequent performance. A good understanding of the pile foundation design principles and construction practices is essential for every practitioner, designer, builder and supervisor involved so that structures will be built and maintained safely throughout the life of the structure.

This course aims to provide participants with an insight into the engineering principles of pile foundation design as well as good construction practices adopted locally with special emphasis on cast-in-place reinforced concrete bored pile compression.

2-day Course on
Good Governance for Management Corporation
(with Enhancement)

The increasing sophistication of property owners and their rising expectation for good governance in managing strata-titled developments could pose a daunting challenge to the management councils. It is important that members of the management councils of such developments are well-equipped with the knowledge of the regulatory framework and the related accounting and auditing requirements under the provisions of the Building Maintenance and Strata Management Act (BMSMA).

At the end of the course, participants will gain an insight into the regulatory framework, the roles and responsibilities of the stakeholders in strata developments, the procedure in conducting general and council meetings of the Management Corporation, the by-laws of Management Corporation and the accounting & auditing requirements that govern the managing of strata property developments. Topics on budgeting, maintenance, management and sinking fund will be discussed. A module on handling disputes is included.
