2-day Workshop on

Behavioural Safety for The Construction Industry

While safety is influenced by a number of factors, positive behaviour from workers towards safety is considered one of the key factors in preventing accidents at workplace. A successful introduction of behavioural safety process, focusing on identifying and reducing unsafe behaviour and reinforcing safe behaviour, is one way to improve safety at workplace.

Behavioural Safety is a methodology used to improve safety culture through change of behaviour of working personnel in an organisation. This methodology has been applied successfully in other industries, namely in petrochemical and manufacturing sector, and is gaining popularity in the construction industry.

2-day Course on
Good Governance for Management Corporation
(with Enhancement)

With the increasing sophistication of property owners and their rising expectation for good governance in managing strata-titled developments, Management Council members are expected to be well-equipped with the knowledge of regulatory framework and its related accounting and auditing requirements under the Building Maintenance and Strata Management Act (BMSMA).

At the end of the course, participants will gain insights into the regulatory framework, roles and responsibilities of the stakeholders in strata developments, procedures in conducting general and council meetings of the Management Corporation, by-laws of Management Corporation and the accounting & auditing requirements that govern the managing of strata property developments. A module on handling disputes is also included.

3-Evening Workshop on
Site Management of Precast Concrete Construction

Good site management practices and planning of precast concrete construction activities would contribute to more efficient, less labour intensive and faster construction. This would eventually lead to better construction productivity.

This interactive workshop provides construction managers with practical knowledge in the planning, execution and control of precast concrete construction. At the end of the programme, participants will be able to plan and manage precast concrete construction site activities effectively.
