2-Day Workshop on Material Recycling for Sustainable Construction

The course is designed to cover key areas that professionals will consider when adopting recycled materials, which include concept and approach, engineering consideration and application.

Engineers and builders can derive value and knowledge from the course through familiarisation with the selection and application of sustainable materials to prepare for the upcoming revised BCA Green Mark assessment criteria.

2-Day Course on BIM Planning (Building Developers and Facility Managers)

Building Information Modelling (BIM) allows the building professionals of various disciplines to explore the building project digitally, before it is built. BIM can help to bring about greater integration and collaboration among the developers, designers, builders and fabricators across the construction value chain.

*Starting with architectural BIM e-submissions in 2013, BCA will mandate electronic submissions in BIM format for architectural, structural and M&E plans of building works for regulatory approval by 2015.* This 2-Day BIM Planning Course is designed to address BIM uses and approaches for building developers and facility managers.

Half-day Course on
Best Practices for Green and Gracious Builder

This half-day course consists of lecture conducted at BCA Academy followed by visit to a site by Green and Gracious Builders Award (GGBA) winner. It will serve as a platform to share the best green and gracious practices gathered from builders in the Green and Gracious Builder Scheme (GGBS) to assist participants in addressing environmental concerns and mitigating possible inconveniences to the public caused by construction works.

CPD Points
IES-ACES (for REs/RTOs) – Pending

Date: 9 Jul 2013

**Sustainable Building 2013 (SB 13) Singapore**

- **Realising Sustainability in the Tropics**

Jointly organised by BCA Centre for Sustainable Building and National University of Singapore, the SB 13 Singapore is part of the Sustainable Building conference series, where participants get inspiration, share knowledge on sustainable building and work towards realising sustainability in the tropics. Leading experts in their own field will be sharing insights into ideas on sustainability in the tropics.
