Eligible applicant can tap on SkillsFuture initiatives for BCA Academy courses (T&C apply)

- **SkillsFuture Study Award** – up to $5,000 for out-of-pocket expenses
- **SkillsFuture Credit** - $500
- **Mid-Career Enhanced Subsidy** – up to 90% of course fee

Applicant needs to register for the course and apply for the relevant SkillsFuture initiative accordingly. Please click on the respective SkillsFuture initiative above for further details.
FIRE SAFETY MANAGER COURSE

Under the Fire Safety Act 1993 and Fire Safety (Fire Safety Manager) Regulations 1994, it is mandatory for owners of designated buildings to appoint a Fire Safety Manager. Through the Fire Safety Manager, fire safety activities and fire prevention measures are also implemented to promote fire safety awareness among the building occupants.

The aim of the course is to provide knowledge on fire safety, fire protection and fire-fighting facilities in order to perform the roles as a Fire Safety Manager.

BCA-SPM SEMINAR 2017
MAXIMISING PRODUCTIVITY THROUGH PROJECT COLLABORATION

Project Managers play a critical role in delivering projects on time and within budget. With the increasing complexity of projects, there is a need to manage projects more efficiently through collaboration with various stakeholders.

Jointly organised by BCA and the Society of Project Managers (SPM), this seminar presents various roles project managers can play for effective and successful project collaboration through the integration of technology, people and process to improve productivity as a whole.

Programme series on Building Control requirements and processes - *for new entrants to the building industry*

As part of the efforts to familiarise the industry practitioners, especially the architectural and C&S engineering new entrants into the industry, a series of programmes on Building Control Act and Regulations have been launched. Through these courses, the participants will have a good understanding on the requirements involved in the planning, design, construction and implementation of a building development, which will facilitate smooth and efficient submission processes.

(A) 1-day Course on Application for Temporary Occupation Permit/Certificate of Statutory Completion

2-day Course on

Sustainable Facility Management Solutions

The role of facilities managers is to manage the operations of buildings and to minimise operational life cycle costs, as well as the impact of buildings on the built environment. With globalised competitiveness in business operations, FM professionals need to be knowledgeable about business management, strategic planning, construction management and engineering towards sustainability in FM.

The 2-day course aims to provide the participants with the knowledge on how to make a business case for sustainability; establish programs to reduce, reuse and recycle; the analysis of the life cycle costing of sustainable buildings and carrying out building commissioning.

1-Day Course on

**Design of Bolted and Welded Joints in Steel Buildings using Eurocode 3**

Connections form a very important part of any steel structure and integrity of the structure depends on them. Accurate details and specifications are required for fabrication to ensure trouble-free erection. The workshop will focus on connection design specifications as per the new Eurocode 3: Part 1-8: Design of joints. Results of recent research on steel connections detailing and fabrication will also be introduced. The course will be taught with practical examples of connection designs which are reliable as well as economical.

5-evening Workshop on
Geotechnical Design using Eurocode 7

This workshop aims to prepare structural and geotechnical engineering practitioners for the adoption of the Eurocode 7 in Singapore. After attending the workshop, the participants will be able to:

- appreciate the design approach based on the Eurocodes
- appreciate the geotechnical design approach based on SS EN 1997 (EC 7) and Singapore National Annexes
- apply EC 7 for the design of spread and pile foundations
- apply EC 7 for the design of retaining structures
- apply EC 7 for the slope stability and embankment design
