The Objective
This seminar aims to provide building professionals, builders, contractors and developers an overview of the technical and submission requirements in the Guide to Carrying Out Engineering Works within Road Structure Safety Zone and Engineering Activity on Land adjoining Public Streets launched in January 2011. It would provide a forum for participants to seek clarifications on the requirements in the Guide and to gain an insight to the engineering issues involved.
This seminar is particularly informative and interesting as the speakers will share their experience on the challenges and engineering approach adopted and implemented during construction to successfully ensured the safety of road structures and operation of public streets.

The Speakers
Speakers comprises representatives from contactor, consultant and LTA who will give us their unique perspective from their experiences of the work they had carried out to mitigate the impacts their works have on road structures. They will discuss topics that are relevant and applicable to the road industry.

The Topics
Engineering Works within Road Structure Safety Zone
Engineering Activity on Land adjoining Public Streets
Benjamin Sheares Bridge and the Excavation for Marina Bay Sands Integrated Resort, DTL Tunnels
