2-day Course on
Sustainable Facility Management Solutions

The role of facilities managers is to manage the operations of buildings and to minimise operational life cycle costs, as well as the impact of buildings on the built environment. With globalised competitiveness in business operations, FM professionals need to be knowledgeable about business management, strategic planning, construction management and engineering towards sustainability in FM.

The 2-day course aims to provide the participants with the knowledge on how to make a business case for sustainability; establish programs to reduce, reuse and recycle; the analysis of the life cycle costing of sustainable buildings and carrying out building commissioning.

**CPD Points**
PEB: 14 PDUs

**Date:** 13 & 14 Aug 2014  
**Venue:** BCA Academy

2-day Course on
Good Governance for Management Corporation
(with Enhancement)

The increasing sophistication of property owners and their rising expectation for good governance in managing strata-titled developments could pose a daunting challenge to the management councils. It is important that members of the management councils of such developments are well-equipped with the knowledge of the regulatory framework and the related accounting and auditing requirements under the provisions of the Building Maintenance and Strata Management Act (BMSMA).

At the end of the course, participants will gain an insight into the regulatory framework, the roles and responsibilities of the stakeholders in strata developments, the procedure in conducting general and council meetings of the Management Corporation, the by-laws of Management Corporation and the accounting & auditing requirements that govern the managing of strata property developments. Topics on budgeting, maintenance, management and sinking fund will be discussed. A module on handling disputes is included.

Date: 1 & 2 Sep 2014
Venue: BCA Academy

9-months Part-time Specialist Diploma in
ARCHITECTURAL TECHNOLOGY

Architectural designs in Singapore and many parts of the world have evolved rapidly with computerisation and good technical support is critical to ensure delivery of such quality developments. Cognizant of the government’s call for productivity and sustainability, building projects have to be completed quickly and to high standards. Hence there is a need for skilled and knowledgeable technologists to assist the Architectural Consultants and Contractors to achieve this goal.

The Specialist Diploma in Architectural Technology will help prepare you to meet the challenges of the workplace, covering important topics such as project drawing documentation, local building development guidelines, building regulations, integrated online submission of plans for approval, to detailing and good practices. You will also get to explore green building designs and try your hand at providing creative universal design solutions for the built environment.

Venue: BCA Academy

Date: Starting on 7 Oct 2014
(Application close on 7 Sep 2014)
