The International Green Building Conference 2018 celebrates the Year of Climate Action by championing the green building movement. As custodians of the built environment, all of us play an important role in mitigating climate change. Let us delve into the pertinent issues concerning the built environment through IGBC’s carefully curated programme and speakers’ line-up.

CONFERENCE TRACK HIGHLIGHTS

ADVANCING NET ZERO

Hear from thought leaders and be inspired to advance zero carbon development. Learn through detailed case studies of zero energy buildings and join the launch of BCA Green Mark for Super Low Energy Buildings, Singapore’s very own certification for Super Low Energy and Zero Energy Buildings.

- Simon Sturgis
  Managing Director
  Sturgis Carbon Profiling LLP
- Ir. Cary Chan

- Benjamin Towell
  MBA MIPRS CFM
  Senior Manager, Green Mark Department (New Development)
  Building and Construction Authority

LOW CARBON CONSTRUCTION

The way we design and build is being disrupted with new technologies and new processes. Learn from speakers who have been actively involved in delivering projects through Integrated Digital Delivery (IDD), Design for Manufacturing and Assembly (DIM) and the use of Mass Engineered Timber (MET).

- Nick Milestone
  Chairman, TRADA
  Director, UK Structural Timber Association
  Managing Director, & K Structures Ltd
- Dr. Johnny Wong
  Group Director
  Building Research Institute of Housing and Development Board
- Jennifer Loh
  BIM Manager
  Lum Chang Building Construction Pte Ltd
GREEN FINANCING

Climate change will greatly affect financial markets and global financial models. The losses to the global economy will be in the trillions if we fail to take action.

Explore the financing of assets, business models for sustainability and the value of sustainability within the built environment from the experts.
