½ Day Seminar on Building Plan Submission Guidelines 2011

This half-day seminar is designed to share with industry issues with regards to the building plan submission procedures and common errors and non-compliance on the building plan submission procedures, TOP/CSC application, accessibilities requirements and updates on current BCA circulars. Thru this seminar, Qualified Persons and technical officers will be able to understand the requirements of the submission and application process more effectively & efficiently.

At the same time, this seminar will also cover case studies on using BIM for Building Plan submission, one of the key platforms to facilitate a more integrated building process in Singapore.

Date: 23 Nov 2011

1 Day Course on **Sustainable Hot Water & Heat Recovery Systems**

Hot water systems are used in several types of buildings such as hotels, hospitals, hostels and factories. They often consume significant amount of energy resulting in high energy cost and carbon footprint. The hot water system of a hotel can account for up to 10% of the hotel’s energy needs.

Barriers to a more sustainable hot water system include the lack of awareness, safety issues, bad experiences and affinity to traditional hot water solutions. The objectives of this course are:

- Understand the different types of hot water systems.
- Appreciate their impact on energy cost and ROI.
- Learn how to design an energy efficient hot water distribution system.
- Learn how to design an energy efficient heat recovery system.
- Understand the safety and operational issues of heat recovery systems.

**Date:** 1 Dec 2011

1-Day Workshop on **Contract Drafting – The Technicalities and Legalities**

Contract drafting is both an art and science. Merely referring to templates or specimens without having the technical skills and legal knowledge to address the specific needs of a particular project could result in disastrous consequences.

This workshop endeavours to provide a proper training platform for construction professionals and practitioners in the field of contract drafting by imparting the necessary technical skills and requisite legal knowledge. At the end of the workshop, the participants would be able to identify common loopholes and pitfalls in contract drafting, address critical clauses in the conditions of contract and draft contractual letters, documents and submittals.

1-Day Seminar on BCA-REDAS Construction and Property Prospects Seminar 2012

Singapore looks set to achieve an overall growth of 5% for the year of 2011 based on the forecast by the Ministry of Trade and Industry. However, as the global economic environment has become more uncertain, the future growth of the local and regional economies could be further weighed down by the heightened risk and volatility in the Eurozone and US.

Singapore is active in managing the construction and real estate industry as a key economic sector. This is evident from the key policy changes made to the public housing market to discourage speculative demand as well as the implementation of labour tightening measures early this year with the aim of improving productivity.

Looking forward, will a headwind of challenging economic and business environment lead to a more cautious sentiment? What lies ahead in terms of opportunities, challenges and prospects for the construction and property sectors in Singapore and the region in the coming years? These questions will be addressed by prominent speakers at this seminar.
