Build SMART Conference 2015
13 & 14 October 2015 @ Singapore Expo

As one of the key events at the annual Singapore Construction Productivity Week (SCPW), the Build Smart Conference 2015 provides a platform for practitioners from different disciplines to gain insights of overseas and local advancement towards construction productivity, its technologies, processes and concepts, business case, as well as exemplary projects. Day 1 of the conference will focus on productive construction technologies and project management; and Day 2 will focus on building information modelling (BIM) and virtual design & construction (VDC).

1-day Workshop on

Good Industry Practices – Drywall Installation including Wet Areas Application

Drywall as internal partition is gaining popularity as one of the leading solutions towards achieving quality finishing with higher productivity. Besides facilitating a cleaner, quieter and environmental-friendly worksite, drywall construction is quicker with lesser labour requirement.

This course aims to highlight the benefits and good practices of drywall installation introduced in the Good Industry Practices (GIP) guide book on Drywall Internal Partition; and extend the knowledge to other applications for wet areas and Prefabricated Bathroom Unit (PBU).

2-day Workshop on
Managing Project Teams Effectively

This workshop aims to equip participants with practical solutions to effectively manage people by considering (1) what makes people difficult, (2) how we could communicate effectively and manage people’s expectations, and (3) strategies for dealing with difficult people and situations.

Through interactive activities, role play and case studies, participants will learn how to apply the provided tools coupled with their interpersonal skills to deal with all types of work behaviour problems.

2-Day Workshop on BMSMA for Building Management Personnel

To meet the high expectations of home owners and residents, building management personnel need to be well equipped with the knowledge of the governing laws and related procedures for the management of estates. In addition, it is also important for them to acquire good interpersonal communication and people management skills to manage difficult and demanding clients in a positive way.

The course covers the essential procedures and laws related to estate management under the Building Maintenance & Strata Management Act (BMSMA); and provide an awareness and understanding of the crucial people management skills necessary for building management personnel.

1-day Workshop on
Contract Drafting – The Technicalities and Legalities

Contract drafting is both an art and science. Merely referring to templates or specimens without having the technical skills and legal knowledge to address the specific needs of a particular project could result in disastrous consequences.
