Mail Patch

Dear Sir,

PREVENT FLOODING DURING UPCOMING NORTH EAST (NE) MONSOON DUE TO CONSTRUCTION ACTIVITIES

The upcoming NE monsoon is expected to bring about more rainy days and heavy rain. Flood could occur even under normal rainfall if the drainage network is obstructed. Construction activities, if not carried out with due care and responsibility, could cause drain obstruction/choke leading to floods when it rains.

2 As you are aware, flood causes great inconvenience to the public, compromise public safety and could cause property damage. PUB would not hesitate to take stern actions against the contractors who interfere with the drainage system in and around their construction sites.

3 We therefore would like to seek your cooperation to ensure that the public drains within and in the vicinity of your construction sites are choke-free and free flowing at all times.

4 Please carry out the followings:

- i) Provide a plan showing all public drains in and within the vicinity of your construction site. Indicate all diversions, if any, clearly on the plan.
- ii) Take photos to show that the drains and drainage outlets are free from obstruction and constriction. Indicate clearly the photos.
- iii) Engage your QP to supervise the check and endorse the submission.
- iv) Return the attached declaration form and report to PUB within 10 days;

5 We will also carry out enforcement check on selected construction sites, in particular on those sites that have yet to submit the report to us after the deadline.

6 Kindly return the attached declaration form to Mr Goh Hearn (67313419) for recording within 10 days. Please contact Mr Quah Hock Lai (67313318) if you need any clarification.

7 Thank you.

Yours faithfully

TAN NGUAN SEN
