Dear Member Associations,

FIDIC has the pleasure to present the 2010-2011 Annual Report which introduces a new attractive design and format to better communicate the highlights of the past year. The Annual Report summarises the important points of the activities of the federation and the most recent endeavours of the Committees and Task Forces. The Annual Report also includes a section with information from past and upcoming conferences held by FIDIC.

The report calls attention to the 2012 World Consulting Engineering Conference in Seoul, South Korea with the main theme, "Beyond Green - a new Paradigm", which will emphasise sustainable solutions to global challenges. Most excitingly, the report introduces FIDIC’s plans for the Centenary Conference in Barcelona, Spain in 2013.

FIDIC’s new and improved September 2011 Quality Based Consultant Selection Guide and the 1st Edition of the Guidelines for Integrity Management in the Consulting Industry are also enclosed. The aim of these booklets is to effectively communicate FIDIC’s policies and principles. The federation hopes to provide its members with accurate information which is professionally and pleasingly presented.

FIDIC welcomes comments and feedback about the publications. We have included 20 copies of the Annual Report that you can distribute to your members and colleagues. We would gladly send more copies upon request. The Annual Report can also be found on the FIDIC website.

With best regards,

Enrico Vink
Managing Director
QUALITY BASED CONSULTANT SELECTION GUIDE

SEPTEMBER 2011
CONTENTS

PREFACE - THE TASK FORCE

1 INTRODUCTION
1.1 Purpose
1.2 The Importance of Appropriate Consultant Selection
