INVITATION FOR REGISTRATION

From 5th to 9th November 2014, the Building and Construction Authority of Singapore (BCA) will be organising the inaugural **Singapore Universal Design Week (SUDW) 2014**. Themed “An Inclusive Built Environment through Universal Design”, the SUDW serves to provide a platform to address issues and challenges faced by users today, to discuss on policies and plans for implementation to improve accessibility and, to showcase examples with outstanding user-friendly provisions for all users - elderly, persons with disabilities and children.

**[Anchor Event]**

**Universal Design (UD) Conference cum Products Showcase: Universal Design in Architecture & Urban Spaces**
**Date: 5th and 6th November 2014**

**Venue: Suntec Singapore Convention & Exhibition Centre**

During the SUDW 2014, a unique 1.5 day UD Conference cum Products Showcase will also be held at the Suntec City. This 1.5 day event will provide a platform for our industry stakeholders and representatives from the public and people sectors to know and learn more on UD concepts and their applications. In addition, Design Workshop and Building Tours will also be available for registration. Please refer to the appended or [CLICK HERE](#) for further details/registration – Special package fees and early-bird discounts will be available till 3 October 2014.

Thank you.

DESIGN WORKSHOP
Suntec Singapore Convention & Exhibition Centre,
Level 3 Meeting Rm 330, 6 Nov 2014, 1.30pm-6.00pm

DESIGNING FOR PEOPLE WITH DEMENTIA conducted by Kirsty A. Bennett
This workshop will focus on the design of dementia-friendly facilities and
evidence-based design principles. It is intended to provoke conversation
and to share knowledge and expertise. Through the interactive session,
participants will gain a new appreciation of what can be done to improve
the care of a person with dementia through good design.

WORKSHOP TOPICS
• the role of the environment in the care of a person with dementia
• 10 evidence-based principles of designing for people with dementia
• case studies Australia: applying the principles in specific projects
• how to apply these principles to your environment, including the use of audit tools
• understanding the Singaporean context
• case studies Singapore: applying the principles in specific projects
