LIVEABLE & SUSTAINABLE CITIES: EMBRACING THE FUTURE THROUGH INNOVATION AND COLLABORATION
INNOVATE AND COLLABORATE FOR BETTER, SMARTER CITIES

Mayors can look at embracing disruptive innovations and public-private collaborations to advance the development of their cities.

Touching on this year’s theme, “Embracing the Future through Innovation and Collaboration”, Mr Lawrence Wong, Singapore’s Minister for National Development, recognised the importance of harnessing disruptive technology to build smarter cities. “Rapid advances in technology like digitalisation, big data and artificial intelligence are all potential game changers that will enable us to reimagine and rebuild our cities,” he said.

SOUTHEAST ASIA GETS “SMART” ABOUT URBANISATION

Connectivity and collaboration will form the backbone of smart and sustainable cities in the region, as ASEAN leaders and industry experts demonstrate.

Speaking at the inaugural ASEAN Smart Cities Network (ASCN) meeting on 8 July, Singapore’s Minister for Foreign Affairs Dr Vivian Balakrishnan stressed that private sector solution providers and city and state planners must focus on developing urban innovations characterised by interoperability and integrated services – especially in a region as diverse and connected as Southeast Asia – in their quest to build smart cities of the future.
