Why does BIM need new contract clauses and new procurement models?

-Organised by Centre for Project Management and Construction Law, Department of Building, National University of Singapore

Date: 17 November 2015, Tuesday
Time: 11.00am – 11.45am (Briefing)
11.45am – 12.00pm (Q&A)
Venue: SDE3, Level 4, LR425,
School of Design and Environment, NUS
Chairman: Associate Professor Philip Chan
Speaker: Professor David Mosey PhD

Synopsis
A briefing by Professor David Mosey on current research, led by King’s College London and sponsored by the Society of Construction Law, as to how construction contracts and team selection processes can help make BIM work.

David is Director of the King’s College London Centre of Construction Law. He is also lead mentor for the UK Government trialling new procurement models that support the mandate for BIM to be used on all public sector projects by 2016. David will illustrate his talk with UK case studies, including the largest prison in Europe, where BIM has been combined with collaborative working and early contractor involvement.

He will assess the impact of BIM on design liability, the duty to warn, project programming and intellectual property rights, as well as risk management and dispute resolution.

About the Speaker
Professor David Mosey PhD is Director of the King's College London Centre of Construction Law and Dispute Resolution, part of the Dickson Poon School of Law, and is former Head of Projects and Construction at Trowers & Hamlins solicitors.

With over 30 years' experience advising on building and infrastructure projects in the UK and the Middle East, David is described in the Chambers Guide to the Legal Profession as a "partnering guru" who "gives something to the industry". He is principal author of the PPC2000, TPC2005 and PPC International partnering contract forms. David and his team at Trowers & Hamlins won the UK Builder and Engineer "Construction Law Firm of the Year" 2011, and David won the UK Constructing Excellence "Achievers Award" 2009.

David jointly led the UK Government "National Change Agent" team from 2005 to 2011, using regional consortium procurement to secure substantial cost savings, more energy efficient designs and over 500 new apprenticeships on housing programmes. He is currently "project mentor" on several UK Government "Trial Projects", testing the savings and other benefits achieved through the combination of early contractor involvement, collaborative working and Building Information Modelling.

David is author of “Procurement and Delivery Guidance Using Two Stage Open Book and Supply Chain Collaboration”, launched by UK Secretary of State Sir Vince Cable in July 2014 and available on the Cabinet Office website. He is currently leading a research project at King’s investigating the potential for construction contract processes and provisions to facilitate Building Information Modelling.

REGISTRATION DETAILS
The seminar is FREE. For enquiries, please contact Ms Amanda at 6516 4836.
