Dear Sir/Madam

JOINT BCA-SLA CIRCULAR ON ACCESSING BOREHOLE DATA USING INLIS

This joint BCA-SLA circular is to inform the industry on the availability of geological information (i.e. borehole data), which were collected from public sector projects, at the Integrated Land Information Service (INLIS) website. This is part of the efforts of the government to make available data to the industry to be used as a reference to facilitate underground development. Whilst every effort is made to ensure that the borehole data is correct, you should, at your own discretion, take necessary steps to verify the accuracy, adequacy or completeness of the borehole data obtained from INLIS prior to undertaking any underground development.

2. The INLIS will serve as a one-stop portal for accessing the above mentioned borehole data and they will be available from 15 Aug 2018 at the following link: http://www.sla.gov.sg/inlis. Please note that by accessing INLIS platform, users are deemed to agree to the Terms and Conditions of Use as stated in INLIS. A copy of the user guide for downloading the borehole data is also attached for your reference.

3. We would appreciate it if you could disseminate the contents of this circular to your members. The user guide for accessing the borehole data is enclosed in the Annex. Please contact Lim Yong Siang at Tel 67304345 or email Lim_Yong_Siang@bca.gov.sg if you need any clarification. Thank you.

Yours faithfully

Step 1: 
Click on the Utility Information tab to search Borehole Data.
Step 2: User will login using their SingPass ID.

Advisory Note
Your SingPass account contains a lot of personal data. Do not share your username, password and 2FA details with anyone.
Step 3:
User can search borehole information with ONE of the search parameters.

Borehole Information
You can query, retrieve and print information on Borehole Information via a graphical search function and four other textual search keys. They are search via Address, Agency Owner or Lot Number. There is no fee charge for downloading borehole information.

The identifier for Borehole Information is in alphanumeric format. These points are also Precise Level Benchmarks (PLBM) that formed the primary levelling network in Singapore. Each of these points is surrounded by four witness marks and their reduced levels are given relative to the mean sea level. Locality sketch or photo image is also included for easy reference. Click here for sample.
