Launch of SS 270: 2015 *Specification for elastomeric seals for joints in pipework and pipelines*

On behalf of the Standards Development Organisation, PUB would like to extend their invitation for the seminar launch on the revised SS 270: 2015 “Specification for elastomeric seals for joints in pipework and pipelines” to your company. This standard is specified by PUB for elastomeric seals used in potable water service installations. Highlights on the new seal types will be presented at this seminar.

1. Testing bodies, consulting engineers, related government agencies, importers, traders, manufacturers, contractors, specifiers and regulators are encouraged to join us at this seminar to find out more on the revised Singapore Standard.

Programme in Brief:
- Quality and Standards in Singapore
- Standards supporting the chemical and related industries
- Addressing the needs of plastics and rubber industry through standardization
- Overview and highlights of new SS 270
- Application of SS 270 by manufacturers and users
