Eligible applicant can tap on SkillsFuture initiatives for BCA Academy courses (T&C apply)

- **SkillsFuture Study Award** – up to $5,000 for out-of-pocket expenses
- **SkillsFuture Credit** - $500
- **Mid-Career Enhanced Subsidy** – up to 90% of course fee

Applicant needs to register for the course and apply for the relevant SkillsFuture initiative accordingly. Please click on the respective SkillsFuture initiative above for further details.
1-Day Course on The Basics of Design for Manufacturing and Assembly (DfMA)

DfMA is a concept that has its roots in the manufacturing sector. In construction, DfMA is a process whereby buildings are designed for ease of off-site manufacturing and efficiency of on-site assembly. In this course, participants will gain essential concepts and principles of DfMA, design consideration for DfMA, its benefits and challenges as well as applications. Case studies will also be discussed.

Upon completion of this course, participants will be able to:
• Understand the basic concepts and principles of DfMA;
• Appreciate design consideration for DfMA; and
• Understand benefits and challenges of DfMA and how such challenges can be overcome for a successful adoption.

INTER-AGENCY COORDINATING COMMITTEE (IACC) ENGAGEMENT SEMINAR 2017
Updates on Recent Changes in Regulations & New Policies

Chaired by BCA, the Inter-Agency Coordinating Committee (IACC) comprises representatives from various building regulatory agencies (EMA, LTA, NEA, NParks, PUB, SCDF, URA), public sector developers (HDB, ITC) and industry associations (ACES, IES, REDAS, SCAL, SIA). The IACC primarily facilitates project teams to quickly resolve issues arising from conflicting regulatory requirements that may impede construction activities and reduce productivity.

The seminar provides a platform for Singapore’s building regulatory agencies to share with industry practitioners on regulatory updates and future initiatives. Industry practitioners will also be able to seek clarification on current regulatory requirements, and understand how IACC can help to resolve conflicting policies implemented by the agencies.

1-Year Part-Time Course on
Specialist Diploma in
UNDERGROUND CONSTRUCTION

Land-scarce Singapore has historically looked to build both upward with taller buildings and outward by reclaiming land from sea. However, another area that Singapore could do more with, is its underground space. The underground space holds possibilities for creating additional subterranean transport hubs, pedestrian links, cycling lanes, utility plants, storage and research facilities, industrial uses, shopping areas and other public spaces. Developing competency in the area of underground construction is critical to realizing such subterranean construction projects.

The Specialist Diploma in Underground Construction aims to equip contractors and consultants at the supervisory level with the knowledge in geotechnical design concepts, considerations and construction techniques so as to support increasingly complex and challenging underground construction projects.

1st Run: Starting in Jan 2018
Application Closing Date: 27 Oct 2017

3-day Course on Management of Water and Environmental Services for Estate Managers
(Partnership with PUB and SEI)

Property and facilities management is a growing industry in Singapore. With the increasing number of strata residential developments in Singapore and rising expectations from the home occupiers for proper maintenance of the estate, it is essential to equip the estate managers in effective management of their facilities and premises, in particular to the water supply, sanitary, drainage systems and environmental control.

The course aims to provide an overview of the relevant local authorities’ regulatory requirements and guidelines. It will highlight the good management and maintenance practices for water, drainage and sewerage services, wet facilities and waste collection system. Water Efficiency Measures will also be covered.

2-Day Course on **Effective People Management for Construction Professionals**

The construction industry is one which requires various stakeholders to establish a collaborative working relationship. In addition to technical skills, built environment professionals are also expected to have good personal, communication and people management skills to effectively handle and manage the day-to-day activities.

This 2-day course aims to impart to the participant effective people management practices in managing complex changes and uncertainty in workplace. Through this course, participants will learn the strategies to build up proactive relationship, manage conflicts and achieve effective resolution in workplace. Case studies will be shared to enhance participants’ learning.
