2-Day Conference @ BCA Academy

Engineering Days Asia 2012

The Engineering Days is a well-established conference in Europe and a platform for discussions between operating precast companies and technology leaders. The success of the Engineering Days in Vienna and the emerging precast market in the Far East lead us to host the Engineering Days for the first time in Asia.

Themed “Design the future, build on strengths”, the conference comprises lectures and workshops together with leading companies in the field of concrete precast technology; an exhibition of well-known suppliers in the fields of mechanical engineering, automation technology, CAD and ERP-systems; and a networking dinner.

For detailed information and registration, please refer to the congress homepage at www.engineeringdays.org.

Date: 22 & 23 Nov 2012

BCAA-SISV Joint Seminar 2012

Recent Trends and Emerging Issues in Construction Law and Contracts

Jointly organised by BCA Academy and the Singapore Institute of Surveyors and Valuers (SISV), the Seminar provides a platform to discuss the current trends of contracting and dispute resolutions as well as cases of interests pertaining to the Security of Payment Act. In addition, best practices of contract and procurement management for complex projects would also be shared through case studies. Participants would gain from the experience and knowledge shared by the Speakers, through an understanding of the issues and solutions that have arisen from recent cases.

A half-day **bizSAFE Workshop for Company CEO / Top Management**

**bizSAFE** is a programme which is administered by the Workplace Safety and Health Council (WSHC) tailored to assist the Small and Medium Enterprises (SMEs) to build up their workplace safety and health capabilities. The programme provides a 5-level approach to help SME build up their capabilities progressively. SMEs participating in this programme will gain recognition and benefit from having a comprehensive WSH system in place.

To start the bizSAFE journey, an enterprise’s top management has to sign up for the bizSAFE workshop for CEO / Top Management. Upon successful completion of the workshop, the company will be granted bizSAFE Level 1.

**CPD Points**

2-day Workshop on **Protection against Lightning for Buildings**

Singapore experiences the highest incidence of lightning strikes in the world. These lightning strikes have caused major disruptions to main systems equipment and considerable damage to building structures. Understanding of lightning phenomenon and proper setup of lightning protection system are critical for the protection of lives, properties and equipment.

The 2-day workshop will provide participants with an understanding of the effects of lightning and various lightning protection methods for building structures. It will also cover various analytical methods for the performance assessment of lightning protection systems. The new Singapore Lightning Protection Code SS 555:2010 which is mandatory for building structures in Singapore will be discussed.

**CPD Points**

**PEB:** Pending

**Date:** 27 & 28 Feb 2013
