Dear Industry Professionals,

1. Please be informed that Enterprise Singapore has officially launched the updated version of SS EN 1997-1: 2010 (2018) and NA to SS EN 1997-1: 2010 (2018) on 28th August 2018. In this revision, the Model Factors for pile design specified in NA to SS EN1997-1 have been revised to align the pile design closer to CP4 and to satisfy requirements recommended by joint BCA/IES/ACES/GeoSS Circular issued on 22nd September 2016. Hence the impact of the changes is expected to be minimal.

2. QPs are reminded that all new projects with ST01 submitted on or after 28th Aug 2018 should adopt the updated version of SS EN 1997-1: 2010 (2018) and NA to SS EN 1997-1: 2010 (2018).

3. Please contact bca_enquiry@bca.gov.sg should you have any query.

Thank you.

Best Regards,

Project Manager
