Standards Forum: Industry 4.0 – Driving Change through Standards
18th October 2018

Singapore, in collaboration with Deutsche Messe AG, will be organising the inaugural Industrial Transformation Asia Pacific (ITAP - the Asian edition of the Hannover Messe trade show) focusing on the digital factory, smart logistics, 3D printing and industrial automation from 16 to 19 October 2018.

During this week-long event, Enterprise Singapore and the Singapore Standards Council will be organising a Standards Forum with the theme “Industry 4.0 – Driving Change through Standards” on 18 October 2018 (9.30am to 1.35pm) at Singapore Expo.

At this forum, overseas and local experts will share insights on adopting advanced manufacturing solutions such as the Internet of Things, artificial intelligence, robotics and 3D printing across various industry sectors. They will also highlight the role of standards as a strategic tool in industry 4.0.

Highlights

1. Special Presentations: Status Quo & Signals for the Future of Standards in Advanced Manufacturing and Keeping Things Real with Artificial Intelligence

2. Series of presentations by Singapore-based companies such as Feinmetall, Lingjack, Forefront AM, Nephtech and TUV SUD on the value that standards bring to the journey towards Industry 4.0 from research to deployment

3. Free guided tour of the Industrial Transformation Asia Pacific exhibition after the Forum
