BCA-REDAS Built Environment and Property Prospects Seminar 2016

15 January 2016 • 9.30am – 5.00pm
Grand Copthorne Waterfront Hotel

The global economic conditions remain uncertain. Economic headwinds in China, the world’s largest economy, is becoming increasingly challenging; USA’s growth has been slow and sluggish; East Asia economies have also been experiencing deflationary pressure for years. All these developments in the world will have direct impact in Singapore’s economy and firms.

PROGRAMME HIGHLIGHTS

• Economic & Financial Market Outlook for Singapore 2016: Opportunities & Risks
• Singapore Construction Prospects
• Singapore & Regional Construction Cost Trends
• Commercial Market Update & Outlook
• Real Estate Investment Trends & Outlook
• Industrial Market Update & Outlook
• The Singapore Residential Property Market in 2016 – When Will Measures Be Removed?
• Panel Discussions

2-day Course on
BIM Planning (Building Developers and Facility Managers)

Building Information Modelling (BIM) allows the building professionals of various disciplines to explore the building project digitally, before it is built. BIM can help to bring about greater integration and collaboration among the developers, designers, builders and fabricators across the construction value chain.

Starting with architectural BIM e-submissions in 2013, BCA will mandate electronic submissions in BIM format for architectural, structural and M&E plans of building works for regulatory approval by 2015. This 2-Day BIM Planning Course is designed to address BIM uses and approaches for building developers and facility managers.

1-Day Course on Design of Bolted and Welded Joints in Steel Buildings using Eurocode 3

Connections form a very important part of any steel structure and integrity of the structure depends on them. Accurate details and specifications are required for fabrication to ensure trouble-free erection. The workshop will focus on connection design specifications as per the new Eurocode 3: Part 1-8: Design of joints. Results of recent research on steel connections detailing and fabrication will also be introduced. The course will be taught with practical examples of connection designs which are reliable as well as economical.

1-day Workshop on
Good Industry Practices – Drywall Installation
including Wet Areas Application

Drywall as internal partition is gaining popularity as one of the leading solutions towards achieving quality finishing with higher productivity. Besides facilitating a cleaner, quieter and environmental-friendly worksite, drywall construction is quicker with lesser labour requirement.

This course aims to highlight the benefits and good practices of drywall installation introduced in the Good Industry Practices (GiP) guide book on Drywall Internal Partition; and extend the knowledge to other applications for wet areas and Prefabricated Bathroom Unit (PBU).
