mitigating the risk, challenges and threats which are constantly moving, evolving

ABOUT CONFERENCE

This annual signature event of A-CERTS takes a bold step forward for the January 2016 event by crafting the Seminar themed “Sustaining CERT Response During Emergencies” which is blended with the objectives of enhancing the competency, knowledge expertise and continuous professional development of the attending delegates. 700 delegates with a mix of emergency responders, safety and fire officers, executives, managers and directors is the profile of delegates that is anticipated to converge at the 2016 CERT Seminar.

Yes, indeed a positive and robust attempt by A-CERTS for the up-coming 2016 Seminar. Keeping in rhythm to the dynamic attempt, the program for the seminar is boosted by subject matter experts who would expound on the theme and keep the delegates focused on the relevant, current and contemporary issues which threaten and challenge of company emergency responders in their effort towards mitigating for a safe working environment. The program is promised to invoke great insights with deliverance of strategic industrial relevant presentations with thought provoking debates and panel sessions which will witness industrial experts debating on the issues. What’s more: miss not the golden opportunity to networking with senior executives, influencers and decision makers from across the industry as well as meet and greet your fellow colleagues, high profile peers and associates in the fraternity.

ABOUT THE THEME

The theme “Sustaining CERT Response During Emergencies” is the backdrop that the A-CERTS Conference Organization Committee diligently deliberated to set the stage for the annual CERT Seminar to chronologically showcase, assess and measure the mechanics within the emergency scenario and mark the professional attempts in mitigating the risk, challenges and threats which are constantly moving, evolving and at each instant taking a newer architecture among responders. The Seminar will complement by taking a deep dive into the current and pertinent parameters of regulatory compliance and the cohesive efforts of SCDF enforcement architecture towards making the industry relevant in its preparedness towards any unprecedented event which can be dangerous, disastrous or catastrophic.

A-CERTS believes the need to sustain CERT responses during emergencies by anticipating where in the veins and nerves are the cracks now and where it will be in the future and plugging it is our priority and joint effort. These thoughts will be the underlying buzz throughout the seminar and panel discussions. The players in and within the safety and emergency response as well as the onlookers need to dive in and synergise more than ever before to impeach the unprecedented and many a time, the unpredictable threats and risk to safety across the industry.
