2-Day Workshop on Design of CLT and Glulam Structures using Eurocode 5
19 – 20 January 2016

Compared to the conventional construction methods, the adoption of Cross Laminated Timber (CLT) and Glue Laminated Timber (Glulam) could lead to time and manpower saving of up to 25% at project level. To encourage a wider adoption of this game-changing technology, the industry needs to be able to design the CLT and Glulam structures in compliance to Eurocodes. This workshop will cover the various design considerations and requirements for Eurocode 5: Design of timber structures - Part 1-1: General - Common rules and rules for buildings.

Distinguished speakers from United Kingdom
