Presentation by Daikin

**Topic: SMART LIVING, SMART CONTROLS: Anywhere, Everywhere With Daikin**

Many people have been touched by Daikin by the cool air conditioning by Daikin. Established in 1968, Daikin Singapore mirrored the nation's growth and achieve many firsts in Singapore. For most residential, commercial and industrial applications, Daikin offers a wide range and excellent choice of Energy Efficient Air Conditioning Systems.

In this event, the speaker will showcase new innovations and technologies such as Smart Home and Remote Monitoring System (RMS) to better contribute to Green Building's performance. Daikin Central Remote Control (iTM-base) enhance energy saving and management through a simple Graphic Unit Interface (GUI) to track energy performance.

Building owner or facility manager can manage their air conditioning systems in a Smart & Effective way. No more stress and worries to manage the systems with minimum downtime. Our exhibits and demonstration will provide a better insight of our technologies. This event also provides an additional interactive opportunity for the participants.

Speaker Profile: **Koh Seet Ming** is the Senior Engineer in Daikin (Singapore) Airconditioning Pte. Ltd. Highest Qualification: Bachelor of Technology Electronics Engineering, NTU. Seet Ming has more than 6 years experience in Airconditioning related field. He involves in the design, development, and implement of Daikin's RMS on Fault & Energy Management System, Malfunction/Prediction Alert System, and Dashboard. He conducts seminars, training and provides engineering and service support to M&E consulting engineers, developers, and installers. He has performed several measurement and verification (M&V) for Daikin VRV systems in many of the BCA Green Mark Projects. He advises and provides solutions to building owners on how to optimize the VRV system performance in their buildings.
