BCA DESIGN AND ENGINEERING SAFETY EXCELLENCE AWARDS 2018

The BCA Design and Engineering Safety Excellence Award was launched in May 2008 to give recognition to the Qualified Person for Structural Works (QP(ST)), QP(ST)s firm and the project team for ingenious design processes and solutions in overcoming project challenges to ensure safety in design, construction and maintenance of building and civil engineering projects locally and overseas. We are pleased to announce that a new category for small scale projects (project cost $30 million) has been added.

Building management personnel need to be well equipped with the knowledge of the governing laws and related procedures for the management of estates. In addition, it is also important for them to acquire good interpersonal communication and people management skills to manage difficult and demanding clients in a positive way. The course covers the essential procedures and laws related to estate management under the Building Maintenance & Strata Management Act (BMSMA). It also provides an awareness and understanding of the crucial people management skills necessary for building management personnel.

**Building and Construction Authority**  
**MANAGING PROJECT TEAMS EFFECTIVELY**

Managing people, in general, can be frustrating and demanding on one's time and can result in increased stress levels, especially when we are so consumed in our daily work processes. Very often, project managers, site supervisors, facility managers and building executives are hassled by their site agents, subcontractors, material suppliers and building tenants over all kinds of issues and problems relating to inadequate site facilities, slow work progress, poor building maintenance, high rental fees, etc. Normally, people who lack effective management and interpersonal skills would only exacerbate such situations. Furthermore, the stress of handling difficult people and challenging situations can result in low productivity, low morale and high absenteeism within the team or an organisation. The 2-day experiential workshop aims to teach participants practical solutions to effectively manage people by considering (1) what makes people difficult (2) how we could communicate effectively and manage peoples expectations, and (3) strategies for dealing with difficult people and situations. Through interactive activities, role play and case studies, participants learn how to apply the provided tools coupled with their interpersonal skills to deal with all types of work behaviour problems. Towards the end of the workshop, you should be able to develop a personal action plan that helps you manage your team more effectively.

**ESSENTIALS OF CONTRACTORS ALL RISKS POLICY**

Construction sites are often exposed to risks. Collapse, flooding, fire, falling debris, accidents involving workers or even damage to third party properties are among the common concerns at on-going project site. This course comprising of lectures and case studies, will enable participants to appreciate basic concepts in risk management and acquire better knowledge of the Contractors All Risks (CAR) insurance policy. Besides policy coverage, issues of dealing with CAR claims will also be addressed during the session.

**BEST PRACTICES FOR GREEN AND GRACIOUS BUILDER IMPROVING PERFORMANCE AND SITE PRACTICES**

The Green and Gracious Builder Scheme (GGBS) was launched in February 2009 to raise the environmental consciousness and professionalism in builders. The GGBS small and medium construction (SMC) was introduced in April 2014 to encourage SMC firms to work in a smart and responsible manner. GGBS is also a benchmark of a builders corporate social responsibility to the environment and the general public. Apart from setting standards for green and gracious practices, it also helps to improve the image of the builders and the built environment sector. To stay relevant with the dynamics of the industry, GGBS version 2.1 was introduced in October 2016.

Dear SPM members and partners in the construction professions, building and infrastructural projects are getting larger and more complex. Complexity is not just due to scale, there are higher levels of technical challenges, more technological innovations, more varied stakeholder requirements and expectations, and project operating environment has become more demanding. Higher levels of project management skills are expected. How do project managers, as leaders of project teams, meet these challenges? The Society of Project Managers welcomes you to join our one-day Project Management Conference on 9 November 2017 on the theme Project Management at the Cutting Edge. Come join us! Our six esteemed speakers will share their experiences in projects like the Changi Airport Terminal 4 and Jurong Rock Caverns, and on the developments in project management on the international front. The GAPPS PM Standards, which is adopted for the Accreditation Scheme of SPM, will also be touched on. Register now and see you at the conference!

OBLIGATIONS AND LIABILITIES IN BUILDING CONSTRUCTION WORKS

The stakeholders of construction projects often incur liabilities due to their failure to recognise and comply with certain implied obligations which maybe arise during the design and construction processes. It is, therefore, imperative for the project parties to understand the implied obligations and liabilities prior to the commencement of construction projects. This course will provide the participants with an insight into the obligations and liabilities of the key players in building and construction works, with focus on the Building Control Act. The course will cover the various obligations under contract, tort and statutory duty in building and construction works. The main focus will be on the regulatory framework of the Building Control Act and the recent developments of the Act. These will be discussed and illustrated with reference to the roles of various appointment holders under the Building Control Act with examples of local incidents and decided case law.
