REDAS WSH Leadership Seminar 2018

Today’s construction and infrastructure projects are increasingly complex and larger in scale, which place even greater importance on safer and healthier workplaces through prevention. This seminar aims to demonstrate that safety management in construction must reinforce safety requirements and go beyond by continuously leading by example and making safety a priority before work begins.

As active stakeholder in the real estate industry, REDAS is committed to good WSH DIS leadership and practices. The Association is taking the lead to develop a guide to share good practices knowledge across the industry, with the aim to avoid the common deficiencies in DIS implementation. It is a useful review and reminder of the key techniques that can be applied and includes recommendations for WSH leadership and procurement practices that developers can consider adopting to achieve a higher level of safety. The Guide will be ‘soft-launched’ at the seminar.
